

SpiritoAge

SMK

Oak chips

DESCRIPTION

SpiritoAge SMK is an exceptional product made from medium-toasted wood in medium-sized chips. Its addition imparts distinctive smoky notes that enhance the overall complexity of the spirit. This unique profile makes it an ideal choice for distillers looking to add depth and sophistication to their products.

SpiritoAge SMK can be seamlessly integrated into a spirit either during ageing or finishing. The medium-toasted wood chips express pronounced smoky and briny notes, significantly elevating the spirit's complexity. This combination of smokiness and salinity contributes to a fuller, more voluminous mouthfeel, enhancing the overall sensory profile. It helps to mellow alcoholic notes, increasing persistence and roundness on the palate.

The impact of SpiritoAge SMK on color, aroma, and texture varies depending on the dosage and type of spirit. Its addition ensures a harmonious and sophisticated enhancement, making it an exceptional choice for crafting unique and refined spirits.

DOSAGE

1-10 g/hL

PACKAGING & STORAGE

10 kg
