

SpiritoFine

CRN

Activated carbon

DESCRIPTION

SpiritoFine CRN is a premium carbon, physically activated by water vapor. The activated raw material, combined with its optimal pore size and high internal surface area, makes it exceptionally effective in absorbing and removing molecules responsible for off-flavors.

SpiritoFine CRN is specifically designed for the distillation process. This high-grade activated carbon excels at removing impurities, unwanted flavors, and odors from distilled beverages, ensuring a smoother and more refined final product. It significantly enhances the flavor profile of freshly distilled spirits.

After application, the activated carbon is easily filtered off, leaving behind a purified and improved spirit. For optimal results, it is recommended to dilute the spirit to less than 50% alcohol by volume before treatment.

DOSAGE

1-10 g/L

PACKAGING & STORAGE

10 kg

Sealed package: store in a cool, dry, and well-ventilated area.

Opened package: carefully reseal and store as indicated above. Warning: The product tends to absorb moisture and odors.

COMPLIANCE

This product may be subject to regulatory restrictions in certain jurisdictions and may vary by country. The user is responsible for determining and ensuring compliance with all applicable laws and regulations and must verify local applicability.
